

Entry Level Hypnotherapy Certification Program “Certified Transpersonal Hypnotherapist- CHT”

The National Association of Transpersonal Hypnotherapists (NATH – EST. 1989) is the oldest and largest transpersonal hypnotherapy organization in the United States. It maintains an outstanding reputation for certifying and registering professional and clinical hypnotherapists from a variety of backgrounds across the United States and abroad. Focus is placed on continuing education and the unification of professionals who use meditative-trance states as the primary catalyst for creating transformations in the body, mind, and spiritual directions of their clients.

Many of us like, Edgar Cayce, have experienced some form of hypnosis as we attempt to gain a better understanding of our true nature and our purpose here on earth. Dating back to ancient times, hypnosis has proven itself as an effective therapeutic tool.

Since its 1958 endorsement by the AMA, there has been tremendous growth, in its methods, applications, and acceptance. You may have noticed your own life, or the life of a friend transformed just from these experiences.

This transpersonal intensive training course is designed to move you from study to application. Rated at 120 hours (approximately 40 hours in class and 80 hours of outside study sessions), it teaches beginning, intermediate, and advanced transpersonal hypnotherapy skills. Both the entry-level student and the seasoned professional will benefit from its unique, effective, professional, and personal change methods. Training includes lectures, demonstrations, group and individual experiential exercises and independent study.

This well-established course will train you in techniques that induce states of consciousness and show you how to use them safely and ethically to help others.

During this exceptional week, you will:

- Learn the hypnotherapy induction process from a holistic foundation and apply it safely to other participants.
- Explore self-hypnosis as a tool for memory comprehension and sports fitness attainment as two of many self-help tools.
- Discover ways you can use hypnosis for yourself and others to address such psychosomatic problems as weight reduction, smoking and other addictions, phobias, stress, pain management, improving self-image, and many more.
- Experience the value of hypnosis for past life therapy as you learn introductory regression skills.
- Examine the importance of setting ideals and other concepts from Edgar Cayce material when working with hypnosis.
- Passing completion, certify you to open your own hypnosis practice.

COURSE OUTLINE

- Cayce’s categories of mind
